

## WORD PLAY

## A black and white line drawing of a man wearing a turban and a dhoti, kneeling on a rectangular rug. He is holding a telescope to his eye and looking towards the top left corner of the page. The number '22' is visible in the top left corner.

1	A H L O T Y __							
2	A I J N O R __							
3	E G L M N O __							
4	A A P S T U __							
5	B F F I I L __							

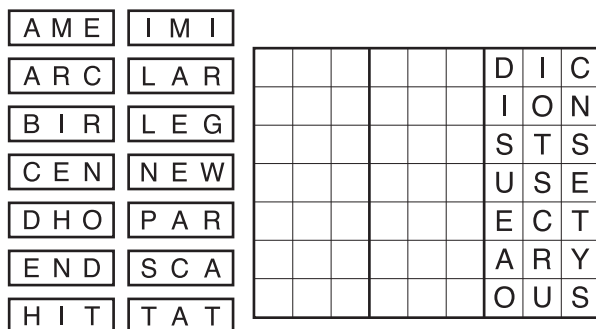

## Word jigsaw

Fit the pieces into the frame to form common, uncapitalized words reading across and down crossword-style. There's no need to rotate the pieces: they'll fit as shown, with each piece used exactly once.

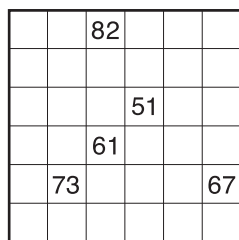

## Block association

Form seven nine-letter words by combining two of the three-letter blocks shown below with each ending in the grid. All blocks will be used. If you do it correctly, two of the vertical columns will spell a two-word phrase.

## LOGIC PLAY

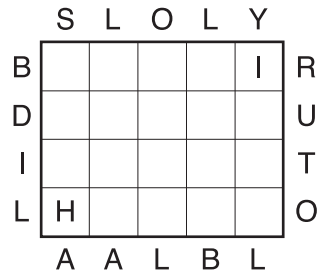

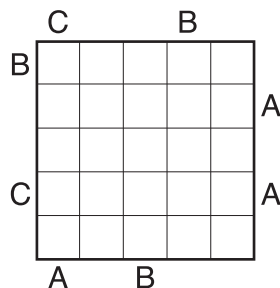

## Pathfinder

A path of 36 consecutive numbers, connected horizontally or vertically, and never diagonally, will complete this grid. Some numbers are given to get you started. Can you place a number in each empty cell to create the only correct path?

## End view

Place the letters A, B, and C into this grid so that each letter appears exactly once in each row and column, with the other two cells in each row and column left blank. Each letter outside the grid indicates the letter that must appear first in its respective row or column (reading in from the edge of the grid closest to the letter, and skipping any blank cells). Can you get the correct pattern? The solution is unique.

## Slide show

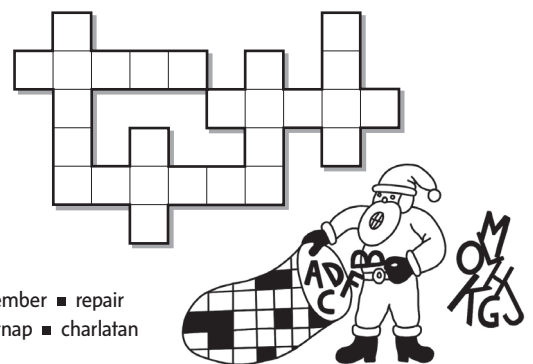

Slide the 18 letters surrounding the grid into the empty squares so that four words are formed reading across and five words are formed reading down. Letters above and below the grid slide vertically to any position without changing columns, and letters to the left and right slide horizontally to any position without changing rows. Each exterior letter is used only once. Two additional letters are already positioned in the grid. Can you slide all of the others into place?

## Pangram fill-in

Use the randomly listed clues to fill in this small crossword puzzle. Each letter of the alphabet will appear exactly once in the completed grid.

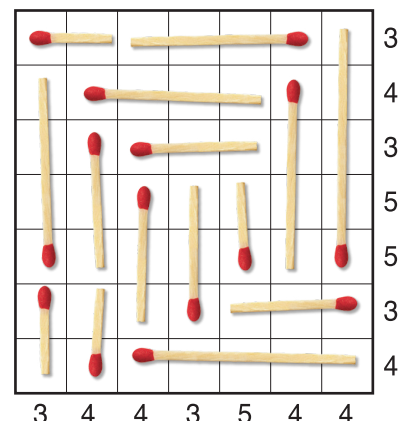

- CLUES** ■ Round Table member ■ repair  
■ make beer ■ takes a catnap ■ charlatan  
■ skittish ■ plug-in Chevy

## Match play

The grid contains unburnt matches of different sizes. You may burn any amount of each match, or leave the match unburnt. You "burn" a match by shading segments from the head (rounded end) to the tail, without skipping segments. The numbers outside the grid indicate the number of burnt segments in the corresponding row or column. Can you shade in the burnt segments to "match" the numbers?

# Spymaster

Deduce a secret number made of four different digits 1 through 9. The chart shows four guesses at the number, and a score for each guess using marbles. Any digit that appears in the secret number in the same position as in the guess is scored with a black marble. Any digit that appears in the secret number in a different position than in the guess is scored with a white marble. Any digit that is not in the secret number does not get a marble. It's up to you to determine which digits are indicated by the marbles. Can you figure out the four-digit number?

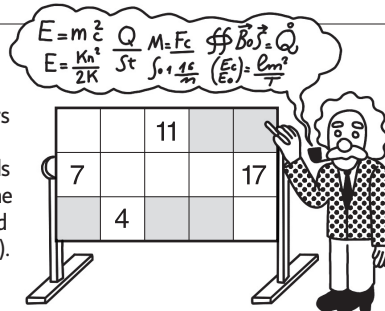

4	1	7	8	<input type="radio"/>	
6	9	2	3	<input type="radio"/>	<input type="radio"/>
9	8	1	2	<input checked="" type="radio"/>	<input type="radio"/>
5	6	8	4	<input checked="" type="radio"/>	<input checked="" type="radio"/>

1		1					1
		1			0		0
			0			1	
			1				0
	0					1	
0				0			
		1					
						1	

## NUMBER PLAY

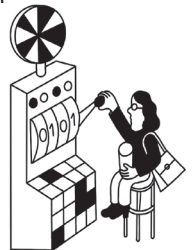

# Hip! Hip! Array!

Place a number in each empty cell of this array so that the numbers in the top and middle cells in each column sum to the number in the bottom cell. Also, in each row, the numbers in the first two cells sum to the number in the third cell; the second and third sum to the fourth; and the third and fourth sum to the fifth. When you've filled the array, convert the shaded numbers to letters (1 = A, 2 = B, etc.). Rearrange these letters to spell a word associated with winter.

## Bits and bytes

Put a 0 or 1 in each empty cell of this grid so that every row and every column contains four 1's and four 0's. No more than two 1's or two 0's can be adjacent in any row or column. The solution is unique.

## Criss-cross math

Place the digits 1 to 9, once each, into the empty cells so that the three rows across and three columns down form correct arithmetic statements. All calculations involve only positive whole numbers and should be performed from left to right and top to bottom, ignoring mathematical order of operations.

	×		+		=6
+		+		×	
	+		-		=3
-		÷		÷	
	×		÷		=4
=3		=2		=3	

## Stay safe

Stick to the bunny hill! In this addition alphabetic, each digit has been replaced with the same letter everywhere it appears. None of the three numbers starts with zero. Can you find the unique solution?

				36
				90
				63
				96
162	18	105	64	

## Times square

Fill in each cell of the grid with a digit from 1 through 9. Each number outside the grid is the product of the digits in its row or column. Important: The number 1 will appear exactly once in each row and column; other numbers can be repeated. Can you complete the grid?

## SOLUTIONS

**Hip! Hip! Array!**

$$\begin{array}{r} 9527 \\ + 952 \\ \hline 10479 \end{array}$$

## Stay safe

6	2	1	8
3	3	7	1
9	1	5	2
1	3	3	4

## Criss-cross math
